**Subject:** Find another location for an impound yard if needed or share one in East Hampton or Southampton

Dear Elected Officials,

It has been brought to my attention that the Long Pond Greenbelt is being used to store utility vehicles and equipment from PSEG.

Of all of the places to store equipment, why are the environmentally sensitive and preserved acres of the Long Pond Greenbelt being used for this purpose?

This land has been preserved for recreational use and for wildlife habitat. Please find an alternate site and respect habitat preservation land. Sag Harbor has plenty of Superfund sites and polluted areas. Let's keep a tiny bit undisturbed for future generations.

We are paying attention!

Sincerely yours,  
Liz Joyce
